

**Important:** Print the template on A4 paper size with 100 % size.

## TEMPLATE FOR MEASURING CHILDREN'S FEET - ELEFANTEN.

### TOP TIPS:

Be sure to measure both feet of your child.

If the feet are different sizes, use the the larger size.

Measure in the afternoon or evening, because feet can still expand during the course of the day.

Measure standing up and wearing socks, and loosen the socks slightly at the toes.

for healthy foot development, it's important to allow enough space for the child's foot to grow whilst still fitting correctly and being comfortable. We have already taken this into account in our sizes.

### TO MEASURE:

1. Check the true-to-life scale of the printout with a tape measure or ruler.

2. Fix the printed template on the floor so that it cannot slip.
3. Place the child's foot on the paper with the heel at the marked spot on the paper. The other foot must be parallel so that weight is even in both feet.
4. Gently stroke the toes so that they relax.
5. Now read the length of the foot from the heel to the longest toe. This gives you your child's foot length.
